

Information Capsule

- + The OAS signed an extension as executing agency, they will be executing activities in Mexico, Colombia and Trinidad and Tobago. We will keep having their support for an additional year.
- + Country meetings will wrap up in December and resume in February due to the holidays, however, the Project Coordination Group will stay in office of emergent issues.
- + Don't miss the latest edition of the GEF CReW+ Champions all the way from Honduras <https://tinyurl.com/bddzad3b>

Operational Updates

In Saint Lucia a biomethane recuperation project is on process, the plant will use solid waste coming from a pig farm as well as sargassum. This project intends to recuperate the methane to produce electricity applying circular economy concepts.

Mexico and Colombia move forward with component III with OAS' support as their executing agency. In Mexico, new eco-technologies will be built in the Mayan communities and in Colombia, a new wastewater reuse pilot project in San Antero.
